

ELECTRONIC BYPASS DAMPERS

Features and Benefits:

- Used to automatically bypass excess air when increases in duct static pressure occur due to closing of zone dampers
- Available in round (12" to 20") and rectangular (8"x 8" to 36"x 24")
- SC-SPC-800 static pressure controller maintains system static pressure from 0.08" to 1.20" WC
- Can also be used to regulate static pressure as an inline pressure reducing damper
- Factory wired and ready for installation
