## SC-VCS Ventilation Control System

### INTRODUCTION

The SC-VCS is a ventilation control system designed to improve residential indoor air quality. This is accomplished by introducing fresh, outside air through an intake damper controlled by a logic panel. The panel controls the amount of fresh air required each hour based on the ASHRAE 62.2 Ventilation and Indoor Air Quality Standard.

### SPECIFICATIONS

Dimensions:	8"H x 6"W x 1.5"D
Construction:	Snap Track Mounted PC Board With Anodized Aluminum Enclosure
Field Wiring:	Class II
Coverage:	1500 - 4000 Sq. Ft.
Adjustable Ventilation Timer:	1 - 60 Minutes
Ventilation CFM Range:	40 - 150 CFM
Power Requirement:	24VAC, 40VA Transformer
Operating Temperature:	-20° to 160° F
Damper Requirement:	6" Round, Power Open/Spring Closed, 24VAC, 10VA Actuator
Warranty:	5 Years
