VENTILATION CONTROL OPTIONS

These Ventilation Control Systems are designed to introduce fresh air into a home through an intake damper. All options are easy to install and ASHRAE 62.2 compliant.

STANDARD VCS KIT

SC-VCS-06
SC-VCS-08

The standard VCS Kit is designed to introduce fresh air into a home through an intake damper controlled by a micro-processor logic panel. The SC-VCS has single adjustment setup, exhaust fan control option, outdoor temperature and/or humidity limit option and damper override capabilities.

Standard VCS Kit Includes:

- VCS panel
- 20VA transformer
- 6" or 8" round damper

ENHANCED VCS-R KIT

SC-VCS-R-ENHANCED

The VCS-R Enhanced panels are preassembled and wired with a single adjustment setup, exhaust fan control options, outdoor temperature and/or humidity limit options and damper override capabilities.

Enhanced VCS-R Kit Includes:

- VCS-R panel with preassembled and relay to energize an exhaust fan
- 6" or 8" round damper

THERMOSTAT VENTILATION KIT

SC-UT32-VK-XX

The Thermostat Ventilation Kit is a low-cost combination of the SC-T32-TS thermostat and intake damper, designed to meet code requirements in both single and multifamily new construction applications. This universal control allows a fresh air damper to be wired directly to the thermostat and eliminates the need for an additional control panel.

Thermostat Ventilation Kit Includes:

- SC-T32-TS thermostat
- 20VA transformer
- 6" or 8" round damper

VCS KIT ADD-ONS

Outdoor Thermostat

CO₂ Monitor
Temperature and Humidity

Humidistat
Humidity control
